Tipuri de Sticlă

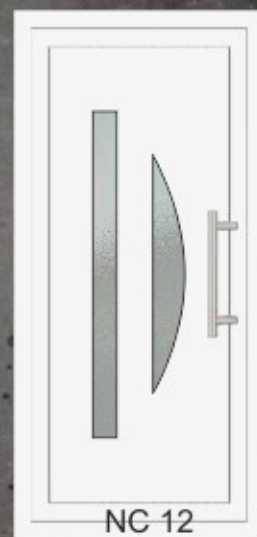

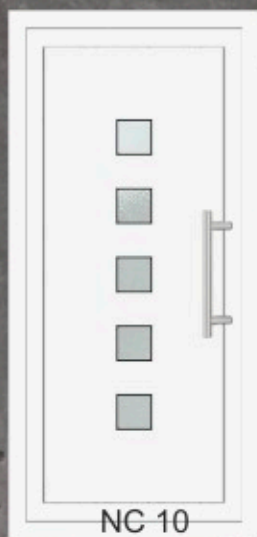

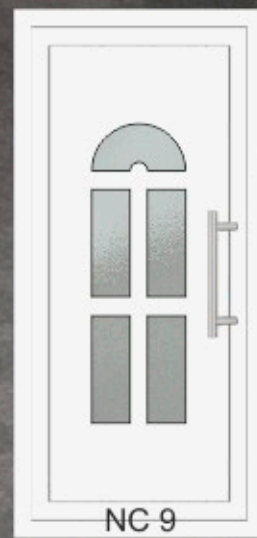

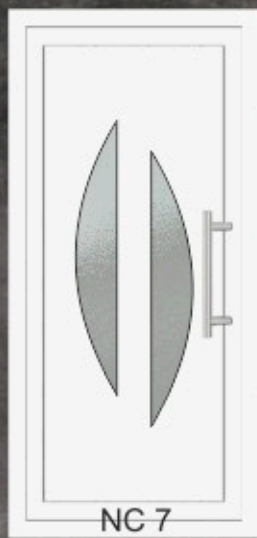

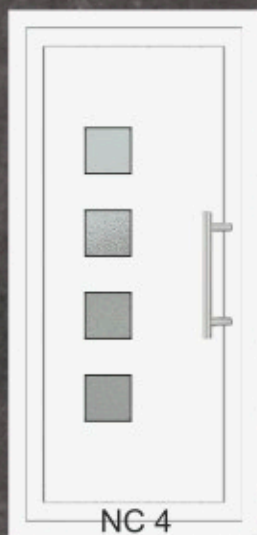

Atelier creație

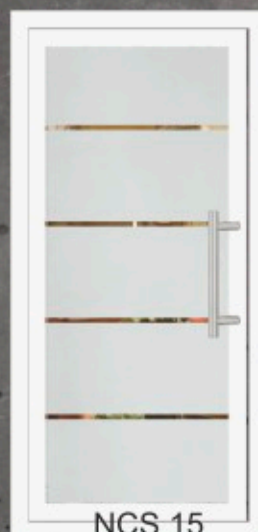

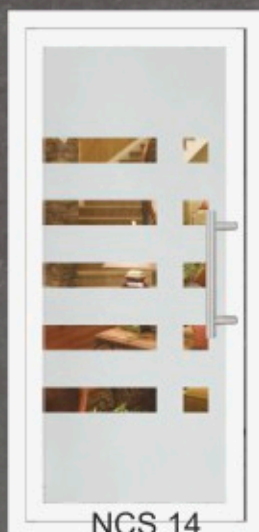

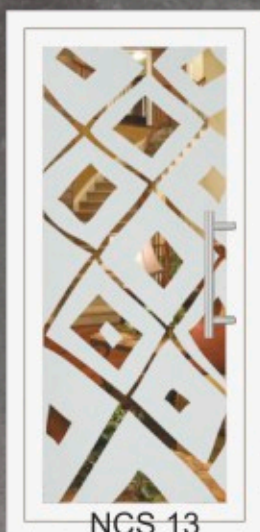

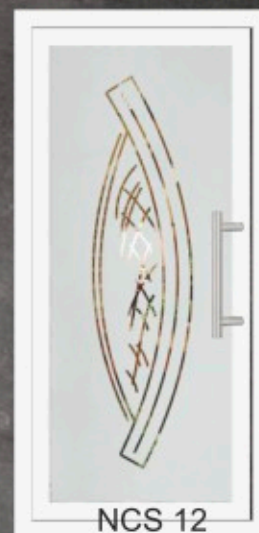

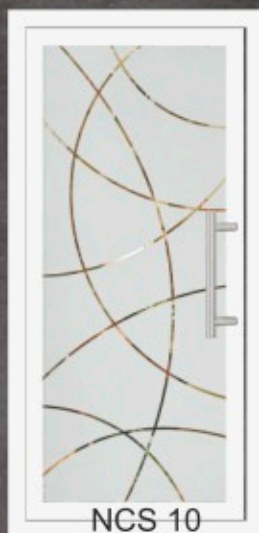

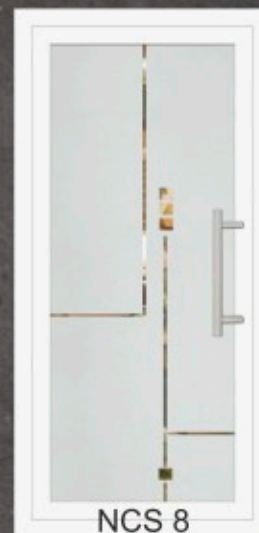

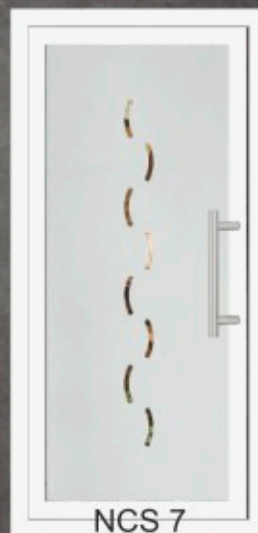

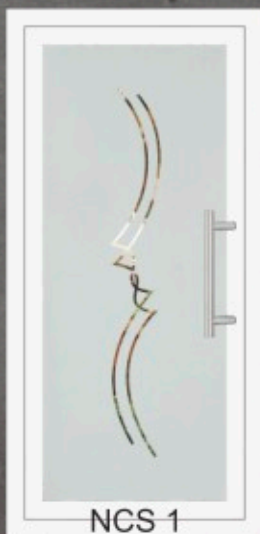

Prin înființarea atelierului de creație am venit în ajutorul clienților de a-și îndeplini visurile în ceea ce privește conceperea proprie a anumitor forme sau desene aplicate pe sticlă cu rășină, fir de plumb sau sablate.

La comandă rășina se poate aplica și sub alte culori cum ar fi aurii, transparent, argintiu.

Tipurile de sticlă sablată oferă un efect deosebit prin combinarea suprafețelor semimate cu suprafețele transparente. Efectul de mătuire oferă intimitate, filtrând lumina discret iar prin diversitatea de modele, un aspect plăcut și rafinat. Pe lângă utilizarea lor la ușile de intrare se mai pot folosi la pereți despărțitori, mobilier sau obiecte decorative, pot fi folosite și pentru personalizarea unor vitrine sau geamuri de intrare în sediile unor societăți. Avem posibilitatea sablării conform schițelor, imaginilor aduse de client.
